TrustCall Dome protects the most important data in the worlds - yours

KoolSpan is dedicated to keeping your mission critical data communications private and secure.

Dome is a KoolSpan invention enabling government and enterprises to communicate freely with a first-rate product, behind any firewall and completely disconnected from the Web.

Fully connected everywhere while maintaining fully protected data

# We protect your data from the global
THREAT OF CYBER ATTACKS

In an always-connected world, there's an ever-increasing need to protect sensitive data and retain privacy coming from the public web.

NSO Pegasus
Cytrox Predator

✓ Phone espionage by malicious applications (NSO Group's Pegasus, Cytrox's Predator and additional others)

✓ Loss of information via human error or device wipe Spyware

✓ Personal data and metadata sharing via third party apps and tools

Our
COUNTERMEASURES

Military-grade secure communication platform: Specifically designed for Military, Government and Enterprise Verticals.
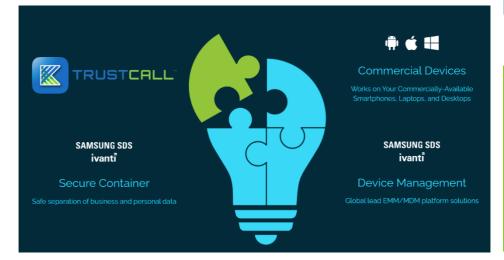

Superior end-to-end encryption based on KoolSpan's patented keying mechanism.

Web-disconnected private infrastructure: Zero-Trust Architecture, operating in fully enclosed environments.

Compatible with any **Devices** and **MDM platforms**

Our unique
VALUE PROPOSITION

Tri-level security approach Physical, architectural and behavioral (Principle of least privilege).

The only solution architected specifically for a Dome/disconnected environment, including failover and redundancy.

Flexible Deployment supports deployments ranging from private cloud to on-premise. All under the protective cover of Dome.

Independent company KoolSpan does not collect your company's data unlike big tech companies like AWS, Google, Microsoft, Facebook, Apple.

Full protection of the data at rest on the device and in transit.
